# Draw a Stingray: Body Outline and Fin Shading

Original tasks 1, 2 / independent work

## Task 1

Using a 10 cm horizontal body axis, place the widest fin point at 4 cm from the head end. Mark half-widths of 3 cm each side. State the total fin span and whether it exceeds the body length in the fin region.

## Task 2

A drawing has a fin span of 9 cm and a body length of 11 cm. The learner shades the fin edge darkest. Describe the corrected shading order from edge to midline.

# Draw a Stingray: Body Outline and Fin Shading

Original tasks 3, 4 / independent work

## Task 3

A stingray outline has a tail base 2 cm to the right of the horizontal axis center on a 12 cm axis. State the correction and the new tail base position relative to the axis.

## Task 4

A learner uses three shading passes: light, medium, dark. They place the dark pass at the fin edge and the light pass at the midline. State the corrected pass order from edge to midline and one reason.
