Easy Anime Eye Drawing: Iris, Highlight, and Lash Shapes

Original worked example / unchanged complete key

Prompt: Draw one anime eye in a 5 cm wide by 3 cm tall eye box. Use a curved upper lash line, a circular iris about 2 cm tall, a pupil about 1 cm tall, and one small highlight in the upper-left iris. Add two lash strokes at the outer corner.

Answer: The finished eye has a smooth upper lash line that thickens toward the outer corner, a lower lid that leaves a gap, an iris circle that touches the upper lash line, a centered pupil, and a small highlight in the upper-left iris. Two short lashes follow the outer curve. The lower lid remains light.
