Orangutan Drawing Simple: Face Proportions and Arm Pose

Original tasks 1, 2 / independent work

Task 1

A face oval has H = 12 cm and W = 9.6 cm. Where should the eye centers be placed horizontally if they sit at 0.25W and 0.75W?

Task 2

An arm has a forearm of 6 cm. Using the hypothetical hand length of 0.6 times the forearm, what is the hand length?

Orangutan Drawing Simple: Face Proportions and Arm Pose

Original tasks 3, 4 / independent work

Task 3

A face oval is 10 cm tall. The mouth line is at 0.75H from the top. How far is the mouth line from the top, and how far from the bottom?

Task 4

You draw an elbow angle of 110 degrees. Is this within the suggested range of 90 to 120 degrees? Explain.
