Oval Face Drawing: Proportion Guides and Feature Placement

Original worked example / unchanged complete key

Prompt: Draw an oval face on a 10 cm by 14 cm rectangle. Place the eye line, nose base, and mouth line using four equal horizontal bands. Mark eye centers 2.5 cm left and right of the center line.

Answer: The oval touches the top, bottom, and side midpoints. The vertical center line runs from top to bottom. Four horizontal bands are marked at 3.5 cm intervals. The eye line is the second horizontal line, with eye centers at 2.5 cm left and right of center. The nose base is on the third horizontal line at the center. The mouth line is halfway between the nose base and the bottom of the oval. Ear guide points sit on the oval edges between the eye line and nose line. All left and right markers are equidistant from the center line.
