Easy Asparagus Drawing: Tip Scales and Stalk Taper

Original worked example / unchanged complete key

Prompt: Draw a spear 10 cm long with a base width of 2 cm and a tip width of 0.6 cm. Add four scale rows. Describe the result and check the taper.

Answer: Draw a 10 cm center line. Mark 1 cm on each side at the base and 0.3 cm on each side near the tip. Connect with gentle curves. Draw four upward-pointing rounded triangles from the tip downward, each slightly wider than the one above and inside the stalk. Check widths at 2 cm, 5 cm, and 8 cm from the base: each should be smaller than the one below. The base cut is a simple straight line.
