Bunny Contour Drawing: Outline-Only Edge Practice

Original worked example / unchanged complete key

Prompt: A bunny faces left. The head is about 3 cm tall, the body length is about 4.5 cm, and the longest ear is about 3 cm. Draw a contour-only bunny with one closed outer contour and two interior overlap lines.

Answer: The drawing shows a left-facing bunny with a continuous outer contour starting at the base of the back leg, moving around the rump, back, head, ear tips, chest, front paws, and returning to the start. Two interior contour lines are added: one where the front ear overlaps the head and one where the front paw overlaps the chest. No shading or texture is present. The feet rest on a level baseline, and the head-to-body ratio is approximately 1:1.5.
