Describe and Draw: Partner Picture Pairs from Written Prompts

Original worked example / unchanged complete key

Prompt: Description: In a 12 cm by 12 cm frame, a house sits in the lower middle, about 4 cm wide. A tree stands to the left of the house, about 3 cm tall. A sun is in the top right corner, about 2 cm across. Label 'HOME' below the house with letters 1 cm from baseline to midline.

Answer: Draw the frame. Mark the centre and the lower middle. Place the house about 4 cm wide in the lower middle. Place the tree about 3 cm tall to the left of the house. Place the sun about 2 cm across in the top right corner. Write 'HOME' below the house with x-height 1 cm. Check each object against the description: house position lower middle, tree left of house, sun top right, label below house at stated height.

Reason: The description gives one frame size, three objects with positions and sizes, and one label with a height convention. Each sentence can be checked independently, so the drawing can be compared line by line.

Check: Use a ruler to confirm the frame is 12 cm by 12 cm, the house is about 4 cm wide, the tree about 3 cm tall, and the sun about 2 cm across. Confirm the tree is left of the house and the sun is in the top right. Measure the label x-height from baseline to midline and confirm it is about 1 cm.
