Drawing Overlapping Animal Scale Rows with Size Gradient and Texture

Original task 1 / independent drawing and calculation

Task 1

In a small band 8 cm wide, draw a row of scales about 6 mm wide and 12 mm high, with gaps under 1 mm. Darken the overlap edges.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Drawing Overlapping Animal Scale Rows with Size Gradient and Texture

Original task 2 / independent drawing and calculation

Task 2

Draw a medium row 12 cm wide with a size gradient from 8 mm to 12 mm. Measure every third scale.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Drawing Overlapping Animal Scale Rows with Size Gradient and Texture

Original task 3 / independent drawing and calculation

Task 3

In a shading strip 2 cm wide and 10 cm long, draw three overlapping scutes and shade only the overlap edges.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Drawing Overlapping Animal Scale Rows with Size Gradient and Texture

Original task 4 / independent drawing and calculation

Task 4

Draw a large band row 15 cm wide with scutes from 12 mm to 18 mm wide, strong overlap, and a smooth gradient.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
