Hair Strand Direction Under Head Tilt and Turn

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Hair Strand Direction Under Head Tilt and Turn

Worked example / complete source key

A head frame is tilted 20 degrees to the left. The crown is marked at the top. Draw three strand arrows: one on the high side, one in the middle, one on the low side. State where each arrow ends.

Answer: High-side arrow: starts at crown, curves slightly outward, ends near the ear line; visible length is short. Middle arrow: starts at crown, curves down, ends at the jaw line. Low-side arrow: starts at crown, curves outward and down, ends below the jaw line; visible length is longest. All arrows follow the head curve and none cross the outline.
