# Draw a North Pole House: Snow Roof, Workshop and Candy Details

Original worked example / unchanged complete key

Prompt: Draw a North Pole house with a snow roof, a door, a workshop chimney and candy-cane trim. Use a 10 cm wide by 7 cm tall wall rectangle (hypothetical). Add a sign with the word 'Workshop' using a baseline and midline.

Answer: A completed drawing shows a wall rectangle 10 cm by 7 cm, a triangular roof with a wavy snow line above each slope, a door with a handle, a window with panes, a chimney on the right slope with a snow cap, candy-cane trim along the left side of the door, and a sign above the door with 'Workshop' written between the baseline and midline. Snow drift shapes appear at the roof edges.
