Rose Contour Drawing: Line-Only Practice with Overlap Checks

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Rose Contour Drawing: Line-Only Practice with Overlap Checks

Worked example / complete source key

A rose bloom shows an outer silhouette and one inner petal whose left edge crosses the outer left edge at point A. The inner petal is nearer. Describe the correct contour at A and one check.

Answer: Draw the inner petal's left edge continuously through A, and stop the outer left edge at A. Check by pointing to A and confirming the outer edge does not continue past the crossing.

Reason: The nearer petal's edge stays unbroken; the farther edge terminates at the crossing. This makes the overlap read correctly without shading.

Check: Trace the outer edge with a finger; if it passes through A, erase the segment beyond A and redraw the stop.
