Map Drawing Practice: Compass Rose, Legend, and Boundary Lines

Original task 1 / independent drawing and calculation

Task 1

On a blank map frame, draw a compass rose in the top-left corner using the lesson convention. Label all four arms. Then state where North points.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Map Drawing Practice: Compass Rose, Legend, and Boundary Lines

Original task 2 / independent drawing and calculation

Task 2

Draw a legend box with exactly three entries: solid line = boundary, dashed line = path, triangle = peak. Then draw one boundary line and one path on the map frame, and one triangle marker. Check that every symbol is in the legend.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Map Drawing Practice: Compass Rose, Legend, and Boundary Lines

Original task 3 / independent drawing and calculation

Task 3

A map has a compass rose with N pointing to the right side of the page and a boundary line that stops in the middle of the frame. Identify two mistakes and state how to fix each.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Map Drawing Practice: Compass Rose, Legend, and Boundary Lines

Original task 4 / independent drawing and calculation

Task 4

Using the boundary-line practice grid, draw two straight boundary segments that each start and end on grid intersections. Then describe how you would check each segment is straight and continuous.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
