Upside-Down Hat Drawing: Orientation Practice

Original worked example / unchanged complete key

Prompt: A student draws a brim band 2 cm tall with the outer edge at the top, and a crown 5 cm tall below it. The crown's wider side is 6 cm and touches the brim. The narrower side is 4 cm and points down. Check orientation and total height.

Answer: Orientation passes: brim is above crown, crown points down, outer brim edge is above inner brim edge. Total height is 2 cm + 5 cm = 7 cm. The crown's wider side touches the brim, so the guide is correctly oriented.
