Draw an Upside-Down Light Bulb: Orientation Practice

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw an Upside-Down Light Bulb: Orientation Practice

Worked example / complete source key

A frame is 12 cm wide and 16 cm tall. The neck is marked 7 cm above the bottom edge. The base is 4 cm tall and sits above the neck. Where is the top of the base measured from the bottom edge?

Answer: The top of the base is 7 cm + 4 cm = 11 cm above the bottom edge. The bulb extends below the neck, so the rounded end is lower than 7 cm.
