Echo Drawing: Copy a Picture Square by Square

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Echo Drawing: Copy a Picture Square by Square

Worked example / complete source key

A reference grid has three columns and two rows. Cell B1 contains a curve that starts at the left edge at the baseline, rises to a peak at half-width at the midline, and ends at the right edge at the baseline. Cell B2 is empty. Describe how to copy cell B1 onto a matching blank grid and state one check.

Answer: On the blank grid, in cell B1, draw a curve from the left edge at the baseline to a peak at half-width at the midline, then down to the right edge at the baseline. Leave B2 empty. Check that the peak sits near the midline and near the middle of the cell width.
