Contour Brush Drawing: Continuous and Blind Contour Line

Original tasks 1, 2 / independent work

Task 1

Draw a continuous contour of a brush with bristles pointing toward you. Start at the handle end, trace one side to the ferrule, around the bristle mass, and back along the other side. Do not lift the tool. Then state one continuity check.

Task 2

Cover your paper and draw a blind contour of the same brush starting at the bristle tip. After uncovering, check edge order and proportion. Name one expected distortion and one valid check.

Contour Brush Drawing: Continuous and Blind Contour Line

Original tasks 3, 4 / independent work

Task 3

A brush outline has four major edges. Your continuous contour completes three edges before the tool lifts. Using simple arithmetic, state whether continuity passes and what to change next time.

Task 4

Draw a blind contour of a brush with a paper cover flap. After finishing, compare it to a continuous contour of the same brush. List two rubric items you can check without judging neatness.
