Coin Drawing Worksheet: Face and Edge Views with Labels

Original worked example / unchanged complete key

Prompt: A coin has a hypothetical diameter of 40 mm and a thickness of 3 mm. Draw the face and edge views, label rim, field, and edge, and add a simple star emblem in the field.

Answer: Face view: a circle of 40 mm diameter with a center cross. An inner circle leaves a 4 mm rim gap at top, bottom, left, and right. A five-point star sits centered in the field with a 5 mm gap to the inner circle. Edge view: a rectangle 40 mm wide and 3 mm high placed to the right. Labels: rim points to the outer ring, field points to the flat area inside the rim, edge thickness points to the rectangle's short side. All leader lines are straight and do not cross.
