Blind Contour Face Drawing with Color Notes

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Blind Contour Face Drawing with Color Notes

Worked example / complete source key

A student tapes a 21 cm by 30 cm sheet (hypothetical example) and draws a blind contour of a face for two minutes without looking at the paper. The student then writes three color notes in a 5 cm margin: cheek edge: warm peach; hairline: deep brown; lip edge: muted rose. The baseline-to-midline guides are 0.8 cm apart. Check the margin width and note count.

Answer: The margin is 5 cm wide, which is at least the hypothetical 4 cm minimum. Three notes each name a region and a color. The x-height guide distance is 0.8 cm, stated as a hypothetical example. The blind drawing is not corrected. The review passes the margin-width check and the region-color pairing check.
