Blind Contour Face Drawing with Color Notes

Original tasks 1, 2 / independent work

Task 1

A student draws a blind contour for 90 seconds and writes four color notes in a margin 6 cm wide. The paper is 20 cm by 25 cm (hypothetical example). The baseline-to-midline distance is 1 cm. Check whether the margin meets a hypothetical 4 cm minimum and whether four notes are present.

Task 2

A blind drawing traces the jaw, hairline, and mouth edge. The student writes: jaw: soft brown; hairline: dark gray; mouth: muted rose. One note extends above midline and is labeled above midline. Check region-color pairing and convention labeling.

Blind Contour Face Drawing with Color Notes

Original tasks 3, 4 / independent work

Task 3

A student looks at the paper twice during a blind contour and then erases one line. The margin has two notes: cheek: peach; nose: tan. Check the blind-drawing discipline and note count.

Task 4

A student measures a margin of 3.5 cm and writes five notes. The stated minimum is 4 cm (hypothetical example). The x-height guides are 0.7 cm apart. Check margin width and note count.
