Chalk Contour Drawing: Blind and Continuous-Line Comparison

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Chalk Contour Drawing: Blind and Continuous-Line Comparison

Worked example / complete source key

A student draws a mug in blind contour for 60 seconds, then in continuous-line contour for 60 seconds. The blind box shows three hesitant marks and one confident mark. The continuous box shows one continuous line with two crossings. The student records 60 seconds plus 60 seconds equals 120 seconds, or 2 minutes. What should the comparison note say?

Answer: The comparison note should state that the blind box is mixed, with hesitant marks and one confident mark, and that the continuous box is continuous with two crossings. The total practice time is 120 seconds, or 2 minutes. No grade is given; the note describes line quality using the convention.
