Butterfly Drawing and Writing Worksheet: Symmetry Guide and Short Response

Original worked example / unchanged complete key

Prompt: A learner draws a butterfly with the body on the guide, left upper wing 3 cm from the guide, right upper wing 2 cm from the guide, and writes three sentences using the word wing. Is the task complete?

Answer: The task is nearly complete. The body is on the guide and the writing meets the length and label requirement. The right upper wing is 1 cm shorter than the left, which is at the edge of the acceptable range; the learner should redraw the right wing to about 3 cm from the guide, then recheck.
