Blind and Slow Contour Drawing: Everyday Objects for Kids

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Blind and Slow Contour Drawing: Everyday Objects for Kids

Worked example / complete source key

A leaf is 12 cm long and 6 cm wide. In the blind box, the drawn leaf is 12 cm long and 4 cm wide. In the slow box, the drawn leaf is 12 cm long and 6 cm wide. Identify proportion drift and state one continuity check.

Answer: The blind box shows proportion drift: the width is 4 cm instead of 6 cm, so the width-to-length ratio is 4:12 rather than 6:12. The slow box matches the object's ratio. Continuity check: trace the outline and note any gap longer than a pencil width; record the location.
