Contour Drawing for Animation Poses: Single-Line Frames

Original worked example / unchanged complete key

Prompt: A figure stands with feet together. Across four frames, the right arm lifts from hanging down to overhead. Draw each frame as one continuous contour line and check continuity and readability.

Answer: Frame one: start at the left foot, trace up the leg, around the torso, down the right arm to the hand, back up the arm, around the head, and down to the right foot. Frame two: same start, right arm angled outward. Frame three: right arm at shoulder height. Frame four: right arm overhead. Each frame is one line; the sequence reads as a lift. Continuity score: 4 of 4. Readability score: 4 of 4 if labels are covered and the order is clear.
