Chow Chow Contour Drawing: Single-Line Outline Study

Original worked example / unchanged complete key

Prompt: A learner draws a Chow Chow outline on a 12 cm by 16 cm box. They start at the top of the head, go left around the mane, lift at the ear, continue around the muzzle, and close at the top. They then draw the tail as a separate curve with a 2 mm gap from the back. They count two unintended breaks in the mane and one in the tail. Using the lesson checks, decide whether the drawing passes and what to redraw.

Answer: The drawing does not pass because the mane has two unintended breaks, exceeding the limit of one per zone. The tail has one break, which is within the limit. Redraw the mane zone on a fresh sheet, keeping the ear lift as a deliberate overlap, and leave the tail as drawn. Recheck the mane for no more than one unintended break.
