Contour Line Panda: A Single-Edge Drawing Study

Original worked example / unchanged complete key

Prompt: Draw a panda contour facing left. Use one continuous line for the head, one for each ear, one for the muzzle, and one for each visible front leg. Keep line weight even and leave a 2 cm margin on a 15 cm by 20 cm box. Count unintended breaks.

Answer: A completed contour study with six continuous lines: head outline, two ear contours meeting the head, muzzle curve meeting the head at both sides, and two front-leg contours meeting the body at the shoulder. The drawing fits inside the box with the margin. Unintended breaks: zero. Line weight is even. No shading or fur texture is present. A strong result would score 2 on each rubric criterion for a target total of 12 out of 12; score your own drawing against the rubric rather than treating these as predetermined marks.
