Peace Sign Contour Drawing: A Continuous-Line Study

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Peace Sign Contour Drawing: A Continuous-Line Study

Worked example / complete source key

Describe a continuous contour path for a peace-sign hand starting at the outer wrist, using the convention above. State where the line changes direction and how you would check it.

Answer: Start at the outer wrist edge and move upward along the palm. At the base of the index finger, turn and follow the outer edge to the tip, then return down the inner edge to the gap. Cross the gap to the middle finger, trace its outer and inner edges, and return to the palm. Continue to the folded ring and little fingers, following their visible folded edges, then to the thumb crossing the palm. Return along the inner wrist edge to the starting point. Check by tracing the same path with your finger: the junctions should appear in the same order, and the line should be continuous or have marked breaks.
