Mirror Contour Face Drawing: Observe and Redraw Edges

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Mirror Contour Face Drawing: Observe and Redraw Edges

Worked example / complete source key

A student draws the jaw edge in the observation box with 3 unintended breaks, the nose with 1, and the eye with 2. In the redraw box the counts are 2, 1, and 3. What is the total unintended break count for each box, and which edge group improved?

Answer: Observation box total: 3 + 1 + 2 = 6. Redraw box total: 2 + 1 + 3 = 6. The jaw improved from 3 to 2; the eye worsened from 2 to 3; the nose stayed at 1. Totals are equal, so no overall improvement is claimed.
