Animals Directed Drawing Worksheet: Sequenced Steps for Guided Animal Art

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Animals Directed Drawing Worksheet: Sequenced Steps for Guided Animal Art

Worked example / complete source key

A learner draws a body oval 4 units wide from baseline to midline, then a head circle 2 units wide centered above it with 1 unit of overlap. They add two ears, four legs to the baseline, a tail, and two eyes. The answer plate shows a rounder ear and a longer tail. Is the drawing valid?

Answer: Yes, provided the head is centered above the body and connected to it; the 1-unit overlap is a chosen example, not a required standard. The legs reach the baseline and the sequence is complete. The rounder ear and longer tail are style differences that stay within the guide lines, so they are valid alternatives.
