Directed Drawing Apple Worksheet: Step-by-Step Guide

Original task 1 / independent drawing and calculation

Task 1

In box 1, draw only the top curve of an apple about 4 cm wide. In box 2, add the two side curves. Describe where the side curves start and which direction they slope.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Directed Drawing Apple Worksheet: Step-by-Step Guide

Original task 2 / independent drawing and calculation

Task 2

Draw steps 1 through 3 in one box. Then draw a stem in step 4 that is 1 cm long and centered in the dip. Explain how you found the center.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Directed Drawing Apple Worksheet: Step-by-Step Guide

Original task 3 / independent drawing and calculation

Task 3

Complete steps 5 and 6: attach one leaf to the stem pointing right, then erase the guide dot and add a highlight curve on the upper left. State one way to check the leaf is attached.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Directed Drawing Apple Worksheet: Step-by-Step Guide

Original task 4 / independent drawing and calculation

Task 4

Repeat the full six-step apple in a blank practice box from memory. Then compare it to the rubric and name one step you would redraw.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
