Blind-Contour Line Drawing of a Scales of Justice

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Blind-Contour Line Drawing of a Scales of Justice

Worked example / complete source key

A learner draws a scales-of-justice figure blind for four minutes. They start at the top of the column, trace down one side, continue across the beam, follow one chain to a pan, trace the pan rim, return up the chain, and repeat for the second pan. They lift the pen twice at chain junctions. After uncovering, they compare the line to the reference.

Answer: The learner notes two continuous junctions at the beam and one break at each chain. They mark one place where the pan rim curve was observed closely. Using the rubric, they score continuity as partial and observation as strong, and they write that simplifying the chains to wavy lines was a valid choice.
