Practice Drawing Anime Eyes at Front, Three-Quarter, and Profile Angles

Original worked example / unchanged complete key

Prompt: Draw a three-quarter view eye pair on a horizontal midline. The near eye is 4 cm wide and the far eye is 2 cm wide. The near iris is an ellipse 1.5 cm wide and 2 cm tall. The far iris is an ellipse 0.8 cm wide and 1.8 cm tall. Describe the lash placement and one check.

Answer: Place the near eye 3 cm from the center line and the far eye 1.5 cm from the center line. Draw both eyes on the same horizontal midline. The near iris sits centered under the upper lid; the far iris is narrower and partly covered by the upper lid. Near lashes extend outward from the outer corner; far lashes are shorter and angle toward the outer corner. Check: the far eye width is half the near eye width, and both iris tops touch their upper lids.
