Continuous Ink Contour Drawing: One Unbroken Line

Original worked example / unchanged complete key

Prompt: Draw a simple mug in one continuous ink line inside a 12 cm by 12 cm frame. Include the rim, one side, the base, the handle, and the other side. Do not shade.

Answer: Start at the left rim. Curve across the rim to the right, down the right side to the base, across the base to the left, up the left side, then loop out to form the handle and return to the left rim. The line crosses itself once near the handle. No gaps, no separate strokes, no shading. The mug is described by one unbroken mark.
