Contour Line Drawing on Paper: Edges, Form, and Clear Line Direction

Original task 1 / supplied guide and independent work

Task 1 / independent work

In a 10 cm by 10 cm box, draw a rectangular box shape. Add one edge contour and one form contour. Describe the direction of each line.

Given guide / complete your own response; this is not a finished answer.

The frame above prints at its labelled size at 100% / no fit-to-page scaling. Record your observations inside or beside it.

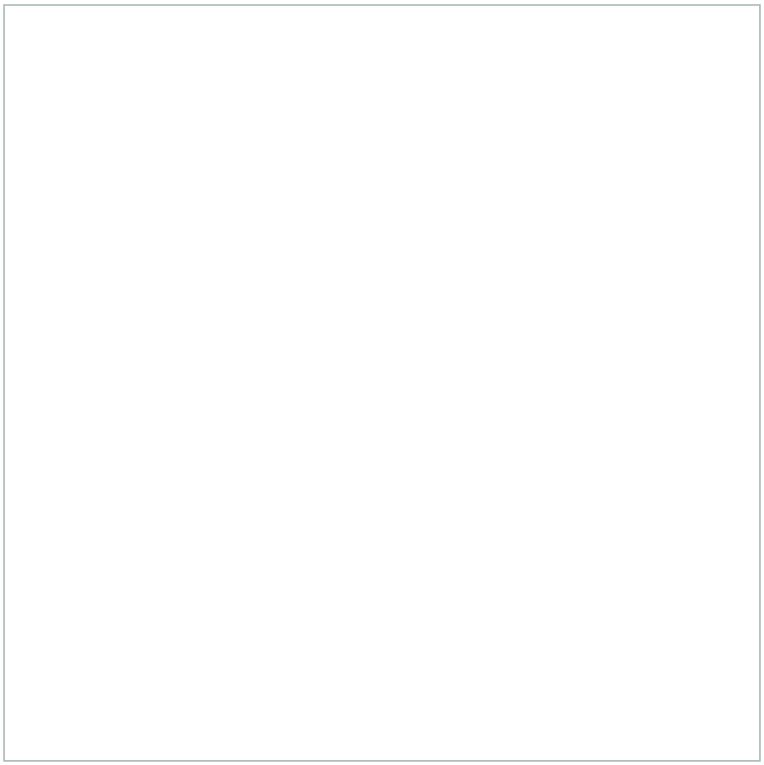

Contour Line Drawing on Paper: Edges, Form, and Clear Line Direction

Original task 2 / supplied guide and independent work

Task 2 / independent work

In a 10 cm by 10 cm box, draw a cylinder standing upright. Add two form contours and explain the spacing.

Given guide / complete your own response; this is not a finished answer.

The frame above prints at its labelled size at 100% / no fit-to-page scaling. Record your observations inside or beside it.

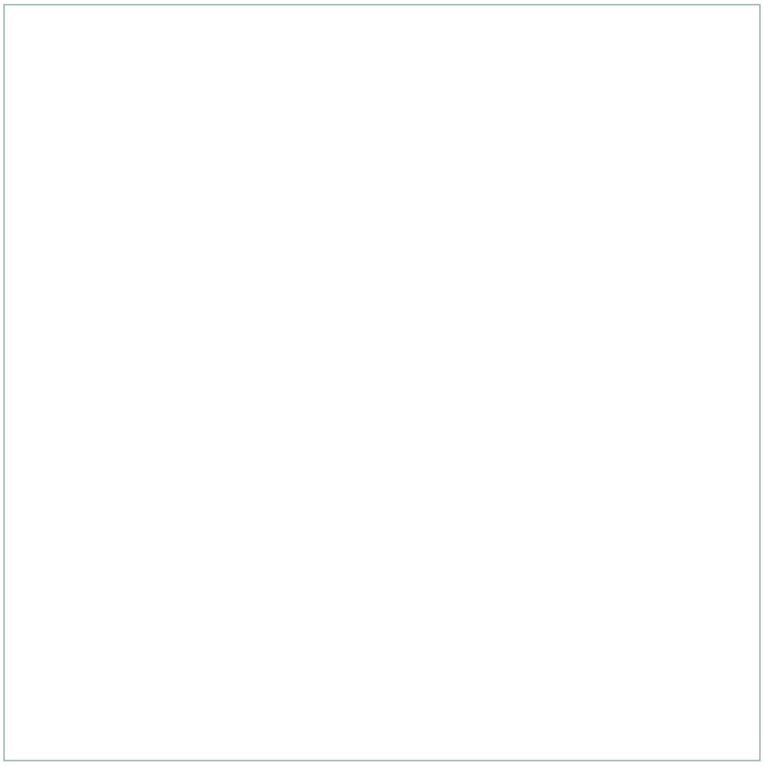

Contour Line Drawing on Paper: Edges, Form, and Clear Line Direction

Original task 3 / supplied guide and independent work

Task 3 / independent work

In a 10 cm by 10 cm box, draw a flat plate seen from the side. Add one edge contour and one form contour, then state why the form line is short.

Given guide / complete your own response; this is not a finished answer.

The frame above prints at its labelled size at 100% / no fit-to-page scaling. Record your observations inside or beside it.

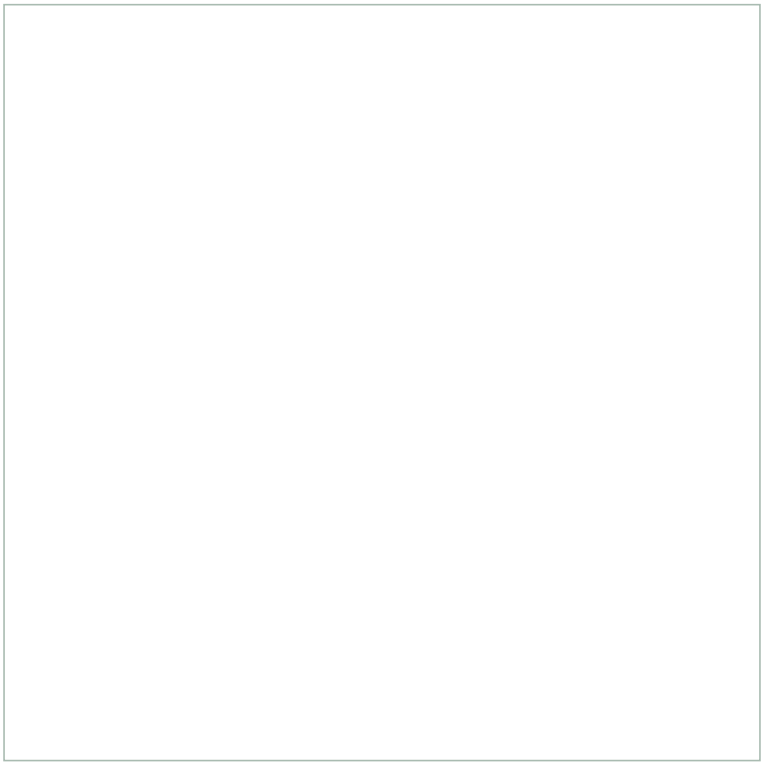

Contour Line Drawing on Paper: Edges, Form, and Clear Line Direction

Original task 4 / supplied guide and independent work

Task 4 / independent work

In a 10 cm by 10 cm box, draw a curved bowl shape. Add three form contours and justify the spacing using the convention that closer lines show sharper turns.

Given guide / complete your own response; this is not a finished answer.

The frame above prints at its labelled size at 100% / no fit-to-page scaling. Record your observations inside or beside it.
