Contour Line Study of a Dollar Bill: Engraved Patterns and Portrait Outline

Original worked example / unchanged complete key

Prompt: A student draws the portrait outer contour and three interior contours. The outer contour is closed. Two interior contours stop at the outer line, but one crosses it. The student also shades the jaw. Identify two fixes and one check.

Answer: Fix one: stop the crossing interior contour at the outer line. Fix two: remove the shading and redraw the jaw as a contour line. Check: confirm every interior contour endpoint touches the outer contour and no line crosses it.
