Drawing Cat Paw Prints from Top, Side, and Angled Views

Original worked example / unchanged complete key

Prompt: Draw a top-view cat paw print on a 10 cm by 10 cm grid where one square equals 1 cm. Use a rounded triangle main pad 3 cm wide and 2 cm tall, and four toe ovals each 1 cm wide and 1.5 cm tall in an arc above it. Add optional claw marks.

Answer: Center the main pad on the baseline. Place four toe ovals evenly in an arc above, spaced about 0.5 cm apart. Add short tapered claw marks above each toe. Label the view with your own lettering at least one x-height tall. Check that the main pad is 3 cm by 2 cm and toes are 1 cm by 1.5 cm using the grid.
