Contour Drawing of Deadpool: Outline-Only vs Detail Pass

Original worked example / unchanged complete key

Prompt: A student measures paper at 20 cm by 28 cm and draws two 9 cm by 12 cm boxes. In box A they draw a closed silhouette with no internal lines. In box B they trace the silhouette and add two eye ovals, one vertical seam, and one belt line. All added lines stay inside the silhouette. Is this a valid comparison?

Answer: Yes. Pass one is outline-only, pass two adds internal contours, both passes use equal boxes, and no detail line crosses the silhouette. The student should add one improvement note per pass to complete the check.
