Practicing Drawing Face Angles: Front, Profile, and Tilt

Original tasks 1, 2 / independent work

Task 1

A profile head is 15 units tall. Place brow, nose base, and mouth guides at half, two-thirds, and three-quarters of head height from the chin. State each distance.

Task 2

A front-view face has eye centers 3 units left and 3 units right of midline. A tilted version keeps total eye span 6 units but compresses the left side to 2 units. What is the right-side distance?

Practicing Drawing Face Angles: Front, Profile, and Tilt

Original tasks 3, 4 / independent work

Task 3

A profile oval has its front edge at 0 units and back edge at 10 units. The nose projects 2 units beyond the front edge. The ear center is 3 units behind the midline at 5 units. State the nose tip position and ear center position.

Task 4

A tilted head has brow guide at 6 units and nose base at 8 units from chin. The left eye is 1.5 units from midline and the right eye is 2.5 units. State the total eye span and the distance between brow and nose base.
