Contour Line Drawing of a Football: Form and Practice

Original worked example / unchanged complete key

Prompt: Draw a football resting on a baseline using contour lines only. Use a hypothetical width of 10 units and height of 9 units. Show the outer contour, a flattened bottom, and two internal contour arcs.

Answer: A completed contour drawing: outer contour is a smooth closed curve, slightly wider than tall, touching the baseline at one point. Internal lines: one gentle arc near the top following the curve, one short arc near the bottom showing flattening. Line weight is slightly darker on the near side. No shading or seams.
