Contour Line Drawing of Furniture: Chair and Table Edges

Original worked example / unchanged complete key

Prompt: Draw a simple chair using contour lines. Assume the chair has a rectangular backrest 40 cm wide and 50 cm tall, a seat 45 cm wide and 40 cm deep, and four legs each 45 cm long. Apply the line-weight convention: darker outer contours, lighter internal edges.

Answer: The drawing shows a chair with a rectangular backrest attached to a seat. The seat is a horizontal rectangle. Four legs extend downward from the seat corners. Outer contour lines are darker; internal lines where the backrest meets the seat and where legs meet the seat are lighter. The backrest is drawn 40 cm wide and 50 cm tall, the seat 45 cm wide and 40 cm deep, and each leg 45 cm long, matching the hypothetical dimensions.
