Joints Practice Drawing Poses: Build Jointed Figures with Limb Pivots

Original tasks 1, 2 / independent work

Task 1

A figure has shoulder-to-elbow 3 units and elbow-to-wrist 3 units. The right elbow pivot is 1 unit below the shoulder pivot. Place the wrist pivot and state its distance from the elbow.

Task 2

A seated pose has hip-to-knee 4 units and knee-to-ankle 4 units. The knee pivot is 2 units forward of the hip pivot. Describe where the ankle pivot goes relative to the knee.

Joints Practice Drawing Poses: Build Jointed Figures with Limb Pivots

Original tasks 3, 4 / independent work

Task 3

A standing figure has left arm segments 5 units each and right arm segments 5 units each. The left wrist pivot is 1 unit higher than the right wrist pivot. Is the arm construction valid? Explain.

Task 4

A template shows six pivot pairs but one label sits on a segment line. State the fix and the check you would use.
