Random Plant Drawing Practice: Sketching Plant Forms from Shape Prompts

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Random Plant Drawing Practice: Sketching Plant Forms from Shape Prompts

Worked example / complete source key

Sketch a plant form for the prompt tall narrow with alternate leaves. Use a stem line, simple closed leaf shapes, and an overall-shape note.

Answer: Draw one upright stem line slightly curved near the top. Attach five simple oval leaves one at a time, alternating left and right along the stem. Write the note tall narrow beside the sketch. The stem dominates the height, the leaves alternate consistently, and the note matches the prompt.
