Draw and Label Exactly Seven Objects: A Counting and Drawing Lesson

Counted source illustration / complete original worked example

Exactly seven source-named objects / one per box

7

circle _____ square _____ triangle _____ star _____ leaf _____ apple _____ sun _____

Worked prompt: A learner has seven blank boxes in a row. Draw exactly seven objects, one per box, and label each on the line below. Then perform a count check.

Answer: The learner draws a circle in box 1, a square in box 2, a triangle in box 3, a star in box 4, a leaf in box 5, an apple in box 6, and a sun in box 7. Under each box, the learner writes the label: circle, square, triangle, star, leaf, apple, sun. The count check: point to each box and count 1 through 7 aloud. The total is seven, matching the numeral 7 written at the end of the row.
