Twin Figure Pose Comparison: Mirrored Drawing Exercise

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Twin Figure Pose Comparison: Mirrored Drawing Exercise

Worked example / complete source key

A first figure has its left elbow 3 cm left of the midline and 7 cm above baseline, and its right knee 2 cm right of the midline and 4 cm above baseline. The upper arm is 4 cm and the thigh is 5 cm. Describe the mirrored joint positions for the twin.

Answer: The twin's corresponding elbow is 3 cm right of the midline and 7 cm above baseline. The twin's corresponding knee is 2 cm left of the midline and 4 cm above baseline. The mirrored upper arm remains 4 cm and the mirrored thigh remains 5 cm. Connect the reflected dots with equal-length segments to complete the mirrored pose.
