Draw Your Zodiac Symbol Worksheet: Grid Tracing and Freehand Practice

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw Your Zodiac Symbol Worksheet: Grid Tracing and Freehand Practice

Worked example / complete source key

A learner draws a circle-based glyph in a 6-cell box. The circle's top touches the midline and its bottom touches the baseline. The learner then adds a short horizontal cross stroke through the circle's center. Describe the stroke order and check whether the glyph fits the convention.

Answer: Stroke one: draw the circle starting at the top, sweeping left and down, closing at the top. Stroke two: draw the horizontal cross from left to right through the center. The circle spans baseline to midline, so the x-height equals the circle height. The cross stays inside the box. The glyph fits the convention; no extension is needed.
