Draw Zoo Animals from Labeled Outlines: A Guided Worksheet Plan

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw Zoo Animals from Labeled Outlines: A Guided Worksheet Plan

Worked example / complete source key

A learner studies the labeled elephant outline and draws it in the practice panel. The template shows the body as the largest shape, the trunk longer than the tail, and four legs shorter than the body height. The learner's drawing has all labeled parts, the body in a similar position, the trunk longer than the tail, and legs shorter than the body height. Assess the drawing with the four-point rubric.

Answer: The drawing passes all four checks: all labeled parts are present, the body position is similar, and the two proportion comparisons match. One line may be circled for improvement, but the overall result is a valid redrawing of the labeled outline.
