Bear Nose Drawing in Perspective: Front, Three-Quarter, and Profile Views

Original worked example / unchanged complete key

Prompt: On a practice sheet with a 4 cm muzzle length, place the nose in front view. The muzzle base is 6 cm wide and the front edge is 4 cm wide. Where does the nose sit and how wide is it?

Answer: Center the nose on the centerline, about 1.3 cm from the front edge (one-third of 4 cm). The nose width is about 2 cm, half the front-edge width of 4 cm. Draw a rounded wedge with symmetrical nostrils.
