Draw a Cartoon Girl in an Aerobic Exercise Pose

Original worked example / unchanged complete key

Prompt: Draw a cartoon girl with the left arm raised and bent, the right arm extended outward, the left knee lifted forward, and the right leg straight. Use head height as the unit: torso 1.5 head heights, each limb segment 1 head height. Add a ground line.

Answer: A balanced cartoon figure with a raised bent left arm, an extended right arm, a lifted left leg, and a planted right foot on the ground line. Construction joints are visible in the light sketch and erased in the final outline.
