Child's Pose Drawing Exercise: Limb Placement for a Stick Figure

Original worked example / unchanged complete key

Prompt: Using x-height 6 cm, draw a child's pose stick figure and state the head radius, shoulder separation, hip separation, forearm length, and upper arm length.

Answer: Head radius 2 cm; shoulder separation 3 cm; hip separation 3 cm; forearm length 6 cm; upper arm length 4.5 cm. The head circle sits between the forearms near the baseline, knees are on the baseline forward of the hips, and shins fold back toward the heels.
