Child's Pose Drawing Exercise: Limb Placement for a Stick Figure

Original task 1 / independent drawing and calculation

Task 1

With x-height 8 cm, calculate the head radius, shoulder separation, and hip separation using the convention.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Child's Pose Drawing Exercise: Limb Placement for a Stick Figure

Original task 2 / independent drawing and calculation

Task 2

A draft shows the head circle centered 5 cm above the baseline while x-height is 6 cm. Is the head placement consistent with child's pose? Explain.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Child's Pose Drawing Exercise: Limb Placement for a Stick Figure

Original task 3 / independent drawing and calculation

Task 3

Using x-height 6 cm, a draft has forearm length 6 cm and upper arm length 4.5 cm. The knees are 3 cm behind the hips. Identify the error and state the correction.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Child's Pose Drawing Exercise: Limb Placement for a Stick Figure

Original task 4 / independent drawing and calculation

Task 4

Describe how to label a child's pose stick figure so that two different lettering styles both pass the rubric.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
