Half-Elf Face on Grid Paper: Mirrored Drawing Guide

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Half-Elf Face on Grid Paper: Mirrored Drawing Guide

Worked example / complete source key

On a grid with a vertical axis between two center columns, the left eye center is 3 cells left of the axis and 4 rows below the top of the head. The left ear tip is 5 cells left of the axis and 2 rows above the eye line. State the mirrored positions and the check.

Answer: The right eye center is 3 cells right of the axis and 4 rows below the top of the head. The right ear tip is 5 cells right of the axis and 2 rows above the eye line. Check by counting from the axis: 3 cells each side for the eye and 5 cells each side for the ear tip, with matching row numbers.
